Guer, on the 12 February 2025

Dear Dotor Muhammad Mudassar Yamin,

You kindly welcomed the second-lieutenant Maxime SOVIS and Marc VERDUN from the French military academy of Saint-Cyr, from September to December 2024 as part of their engineering graduation project at the The Norwegian University of Science and Technology.

This international and scientific experience was a great opportunity for our cadets in their academic training. Your smart supervision has enabled them to develop their skills in the field of computer science and more particularly in the "Open Cyber Range Student Lab Development".

This is also the chance for me to thank you personally for your commitment. I hope that the new training schedule at the Saint-Cyr military academy will allow us to renew this opportunity from January to April 2026.

Best regards,

Lieutenant-colonel Gilbert GIGOT  
Head of the engineering sciences  
and defense technology center  
Military Academy of Saint-Cyr

Dr Muhammad Mudassar Yamin  
The Norwegian University of Science and Technology  
Gövik, Norway
