To Whom It May Concern:

I had the pleasure to work with Muhammad Mudassar Yamin on a complex information security project involving my company's SecAttack research and development division. I cannot say enough about the service and support that he consistently provided to our company.

Mudassar made himself readily available and accessible, answering every phone call and email regardless of how big or small the request was. Given that our company is a startup, our research and development efforts are continuously evolving, which has resulted in many changes to our projects, some of which were very complex and difficult to solve. Somehow Mudassar always found a way to get the job done, responding with a calm and affirmative solution. I never felt that any idea, project, addition or alteration was unattainable.

I truly believe that Mudassar values and respects my requests. Nevertheless, through his challenging and sharp questions we were able to reach more efficiently and effectively the goals that we have set for the project.

I wish Muddasar all the best in his professional career and look forward to future opportunities to work with him. I can highly recommend Muhammad Mudassar Yamin without any hesitation.

Warm Regards,

Philipp Fleischmann
